

KEEP **DIRTY ENERGY** OUT OF THE GREEN CLIMATE FUND

We should be investing in clean energy if we want to combat global climate change.

CLEAN

RERED Program, Bangladesh

- Megawatts produced: 60kw each for 1.23 million solar home systems
- CO2 avoided: 4.14 million tons
- Creates energy access for 2 million rural households
- Jobs created: 30,000 direct, 50,000 indirect
- Profits accrue to community
- Time to completion: 10 years

TOTAL COST: \$758.85 MILLION

DIRTY

Drax Biomass Power Station, U.K.

- Megawatts produced: 1800
- CO2 avoided: none; burning trees can result in higher emissions than coal
- Energy access created: none, adds to central grid
- Jobs created: 150 temporary
- Profits would accrue to private sector
- Time to completion: 2012-2017 for biomass conversion

TOTAL COST: \$1.13 BILLION

Tell the U.S. Government to keep the Green Climate Fund clean at:

bit.ly/CleanGCF

It's the best chance we have to solve climate change.
